

QuickTrack - Motorized Carts

GPS / Wi-Fi / BLE, Cellular Cart Tracking Solution

Prevent Motorized Cart Theft at your stores with instant alerts, notifications and precise geo-location of any stolen carts. Time stamped events allow you to quickly match camera footage to thefts.

How it Works

When carts leave a customizable, **wireless**, geofence - its location is tracked and reported. It's movement and [route history](#) is also recorded for loss prevention investigation purposes.

Optional: When paired with an onsite, wireless, battery-powered, [gateway](#), *instant* alerts can be sent to store management whenever a Motorized Cart exits a store, lingers in a parking lot, or travels past a handicap zone.

What You Need

Cart based tracking device:

- [Mobile Gateway](#)

Optional: [Solar Gateway](#)

[QuickTrack](#) software platform. No onsite infrastructure needed unless pairing with optional Gateway
